

PocketPC Bank Card Expense Tracker user manual

Overview

Bank Card Expense Tracker, is a simple to use utility software for your PocketPC, which allows you to keep track of several bank cards, and expenses made with them. This way you can easily track your budget and know your available balance anytime. You can use this application with any card and currency, since it's a generic amount tracking application.

Note for demo users:

- You can add only 1 bank card in the demo. The full version allows an unlimited number of bank cards.
- You can add only 10 transactions in the demo. The full version allows you to add an unlimited number of transactions.

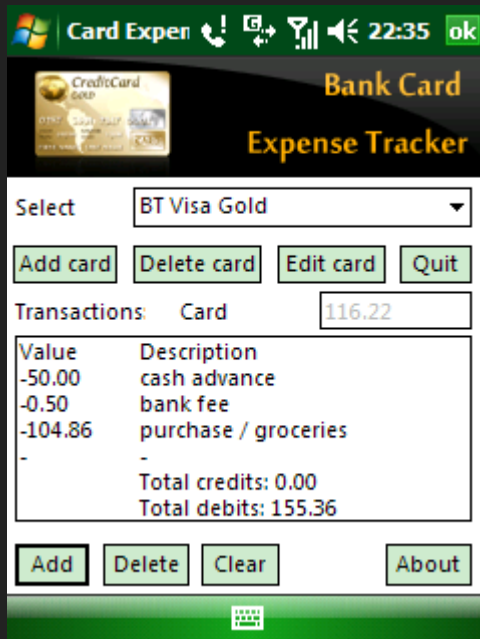

Please visit our website at: <http://www.exosyphen.com> for additional information and ordering the registered version. You may also visit our mobile website, from your device at: <http://mobile.exosyphen.com>

Installing Bank Card Expense Tracker:

Connect your PocketPC to your computer through its data cable or cradle, and wait until ActiveSync starts. After that, run the installer for Bank Card Expense Tracker. On your device, when prompted, choose to install Bank Card Expense Tracker in the device memory.

Under the transactions list:

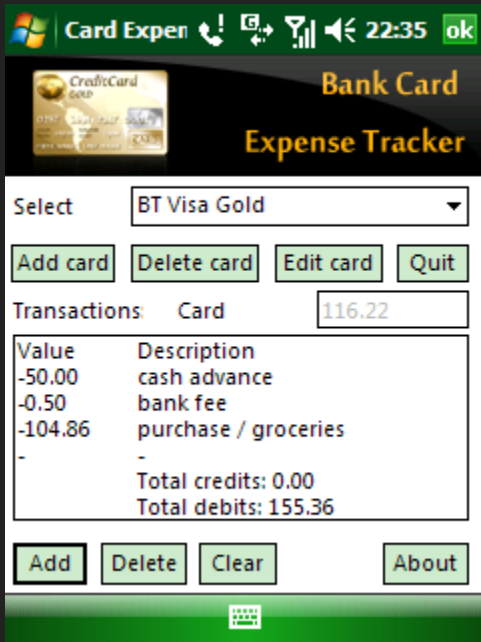

- Add:** Add a new transaction to the currently selected bank card.
- Delete:** Delete the selected transaction from the bank card.
- Clear:** Delete all transactions from the currently selected bank card.
- About:** Information about the application.

Please proceed to the next page of this manual, for detailed descriptions on how to use **Bank Card Expense Tracker**.

After you install Bank Card Expense Tracker, tap the **Add Card** button, to add a bank card.

Enter the name of your card, and its initial balance, and then tap **Ok**. The card will now be added, and you can start adding and managing transactions.

To add a transaction, tap the **Add** button under the transactions list. Select **DEBIT** if the amount will be deducted from your balance (spending) or **CREDIT**, if the amount will be added to the card balance (card funding, etc). Enter the amount, and optional description of the transaction, and tap **OK** to add the transaction list.

Now you can see a list of the transactions and the remaining balance, for the selected bank card.
